

A Clear Mind

Manchu/Diane H. Otti

A spiritual communication from Manchu received by Diane H. Otti on May 17th 2011.

"The lessons begin with a clear mind and steady hand:

Our wish for those in the physical is to open and see all the wondrous gifts around each of you on the earth. So many are "mired" in unhealthy mental and physical habits - that you neglect to see all the gifts that are so close to each of you. The sun rises and sets to give each of you the sense of beginning and end. The clear skies with clouds open the young to truly see the "pictures" with clouds - the sweet smell of morning with bird sound - awakening the day of what comes...the wind gently blows through the leaves - whispering "look at me - I am alive with wonder". Be gentle with actions and words, for long ago, you chose to enter into the "physical" for lessons...and have forgotten the gifts given you. How sweet the remembrance of time long before now, the silence and communication without words. The ideas flowed naturally and many contributed, the natural order of "progression", was not to "get to something" but to contribute to the "whole" the unity of consciousness, of one light, bringing forth ideas and methods of merit. Ah, the single time of Truth! You each have your mission - your task for this life, do not put aside that entity you were before this life - for each has a great light shining outward as the Beacons of Truth; that design of light is returning to consciousness in many of you. The remembrance of time past and the "true purpose" for existence in "this time, this place" and we rejoice!

Hope springs eternal, we can see those that administer the truth, although not many, it is growing and spreading for the "lights are on", the words shared and excitement grows for the door between us is opened a little more and this is the way it was of long ago.

Be of pure intention. Be of open heart and gifts are opened to each of you - filled with love and light beyond compare!
